

ISHWARI INSTITUTE OF CONSCIOUS LIVING

Yoga Teacher Training Course

BY –
DEVIKA & SHWETA

THE JOURNEY FROM PRACTICE TO TEACHING

Yoga begins as a personal practice, but with deeper understanding, it becomes a way of seeing, living and sharing.

To teach Yoga is not simply to demonstrate an āsana or guide someone through a practice. It is to understand the principles behind the practice, to appreciate the traditional wisdom of Yoga, to develop the ability to observe and guide others, and to continue learning along the way.

At Ishwari Institute, we believe that a good Yoga teacher is first a sincere student.

Our Teacher Training Course is designed to provide a strong and meaningful foundation in Yoga – bringing together traditional knowledge, practical experience, teaching methodology and personal exploration.

This course is an opportunity to move beyond practising Yoga for yourself and begin understanding how Yoga can be thoughtfully and responsibly shared with others.

Whether you are taking your first step towards teaching or looking to deepen your existing understanding of Yoga, we invite you to explore this journey with us.

Learn Yoga. Experience Yoga. Understand Yoga.
Share Yoga.

A NOTE FROM YOUR TEACHERS

Why should you choose this course?

Our Yoga journey did not begin at a very young age.

Before Yoga became our profession, we were working professionals – one of us from a background in Law & CA, and the other from Taxation & Finance. We discovered Yoga later in life, explored different institutions, studied deeply, taught, and walked the path ourselves.

And that journey taught us something important:

Choosing the right education and the right certifications matters.

When you enrol with a single institute, you usually receive the certification and approach of that one institution. We wanted to create something different.

So, instead of offering just one certification, we have thoughtfully integrated some of the strongest components from renowned Yoga institutions into one structured teacher-training journey.

 Yoga Pravesh by Yoga Vidya Gurukul gives you a strong foundation in Yoga – both for your personal journey and for developing your understanding as a teacher.

 Yoga Foundation by Indian Yoga Association builds upon this foundation and helps you understand Yoga in a more structured way.

 CCY by Indian Yoga Association brings a deeper theoretical and practical dimension to your learning and prepares you to take your first steps as a Yoga teacher.

Together, these courses create a journey from learning Yoga → understanding Yoga → teaching Yoga.

We also want your learning to continue beyond this course. These qualifications can create pathways towards higher studies such as M.A. Yoga Shastra and further professional development such as YCB Level 2, subject to the respective eligibility requirements.

Tradition with a Modern Perspective

Our teaching does not stop at simply explaining what is written in the books.

We constantly ask:

Why does this work?

How does it work?

What happens in the body and mind?

How can we apply this knowledge in real life?

We bring together traditional Yogic wisdom with modern scientific understanding, so that what you learn is not merely something you memorise for an examination – but something you truly understand, experience and can communicate to your students.

Our aim is not just to help you become certified.

It is to help you become a knowledgeable, confident and responsible Yoga teacher.

Why a Morning Course?

The course is designed around morning learning because we believe it is one of the most conducive times to practise, learn and assimilate Yoga.

You begin your day with Yoga – understand the theory, experience the practices, and gradually develop the confidence to teach them.

We have walked this path ourselves.

Now, we want to make your journey clearer, more structured and more meaningful.

If you have been thinking about becoming a Yoga teacher, you don't have to wait for the perfect time.

Start now.

Learn deeply.

Get certified.

And step into the new year with a new skill, a new purpose and a new beginning.
